

## QUANTUS MANAGEMENT SYSTEM PVT LTD

---

### Abstract

The company was created in 2013, QUANTUS, is a Quality Management company global leader in Auditing, Testing, Inspection, Certification & Training (ATIC&T), delivering high quality services to help clients to meet the growing challenges of quality, safety, environmental protection and social responsibility. Quantus offers innovative solutions that go beyond simple compliance with regulations and standards, reducing risk, improving performance and promoting sustainable development.

Quantus provides well-structured solution from “CONCEPT” to “CERTIFICATION”. We are a Total Quality Assurance provider to industries worldwide. Through our global network of state-of-the-art facilities and industry-leading technical expertise we provide innovative and bespoke Assurance, Testing, Inspection and Certification services to customers. We provide a systemic approach to supporting our customers’ Quality Assurance efforts in each of the areas of their operations including R&D, raw materials sourcing, components suppliers, manufacturing, transportation, distribution and retail channels, and consumer management.

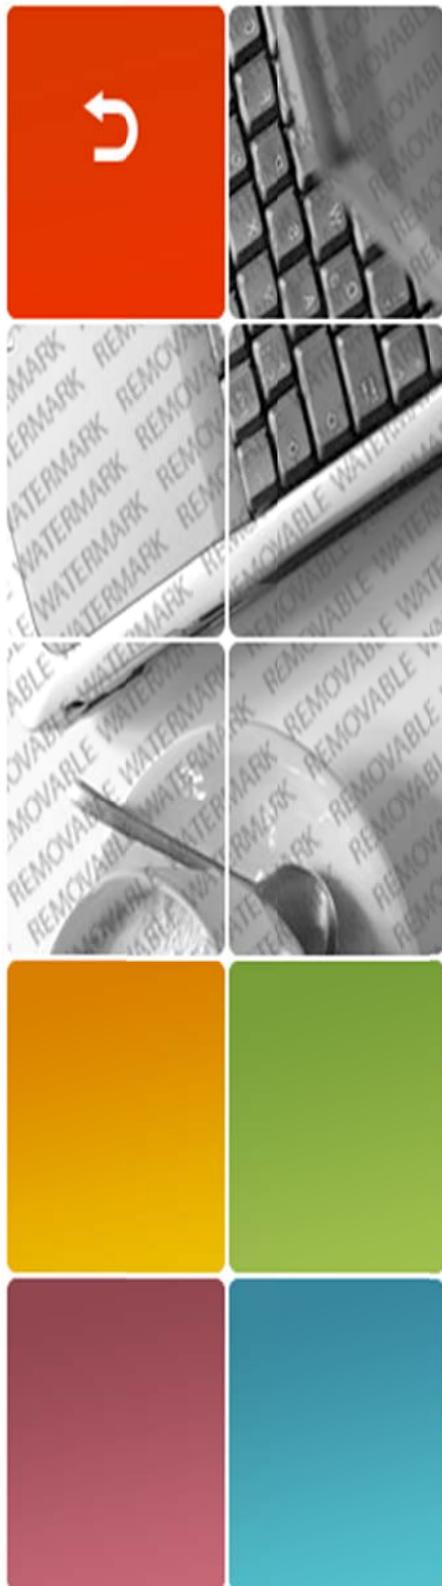

Quantus, is of Lead Auditors, CA's, MBA's, Food Technologists, Engineers and Retired Government Employees, specially trained in the development of various Quality Management Systems for the various industries and specializing in the fields of International Certifications like ISO 9001:2008, ISO 22000, BRC, FSSC 22000, ISO 14000, TS-16949, CE Marking, HACCP, GMP, OHSAS, SIX SIGMA, TQM etc.

We have vast experience in providing complete certification services for International Management standards to Production Units, Food Processing Industries, Dairy & Dairy Product Units, Hospitals, Educational Institutes, Software Companies, Traders and Distributors, Hotel Industries, Packaging Industries, Manufacturing Industries etc. Our services have helped many organizations in successful implementation of efficient & effective management practices & systems thereby leading to certifications to international standard.

An advantage of doing business with us is that you receive a range of services from a single source. As an independent company with accredited expertise and over years of experience, we can help you systematically develop and improve quality and reliability throughout your organization. We have a strong commitment for perfection, safety, sustainability and quality. We have more than 400 clients across the country in various sectors i.e., Manufacturing, Trading, Export, Security, Education, Hospitality, Hospital, Laboratories and others.

## VISION

Vision, Mission and Values, these words have all become “buzzwords” of the twentieth century. To be the most respected, independent and nationally recognized, a leader in our industry. Quantus is committed to help the clients to meet their operational and business objectives in terms of sustainability, profitability and reliability.

### Quantus Vision 2020

- We are recognized as the leader everywhere we do business
- Our services and solutions help our clients succeed
- Our work system is a competitive advantage
- Our business model drives superior results
- Our people are talented and live Our Values in Action
- Our work today helps our customers create a more sustainable world
- Our performance consistently rewards our stockholders

## MISSION

To make a difference for our people and our clients. Our main goal is finding new ways to serve our clients. We provide well-structured solution from

**“CONCEPT” to “CERTIFICATION”.**

## CORE VALUES

### Valuing People

We believe that our success depends first and foremost on people. By respecting people in everything we do, we will develop and maintain high quality, mutually beneficial relationships with our clients, professional colleagues, referral sources, vendors, community members and each other.

### Building Client Relationships

We seek to earn long-term client loyalty by developing a deep understanding of each client's business and personal goals, by demonstrating unwavering reliability and integrity in our work and by acting as an independent and objective advisor to our clients.

### Upholding Quality and Integrity

We will maintain an environment where a commitment to quality, honesty, respect, fairness and professional ethics governs the actions and decisions of everyone within our company.

### Sustaining Stewardship

Stewardship is the careful and responsible management of that which is entrusted to our care. Our goal as good stewards of Quantus is to make the company a better place than it was when we got here. As good stewards of the community, the company proudly contributes time, talent, knowledge and financial resources to a significant 500+ clients.

## What we do

We help our customers to meet end users' expectations for safety, sustainability, performance, integrity and desirability in virtually any market worldwide.

### Auditing

An audit is a systematic evidence gathering process. Non-financial audits of systems and processes involve periodic verifications to verify that a documented QHSE management system or industrial process is being effectively implemented. They help validate compliance with regulatory requirements and industry standards. Audits can also be used as an information tool to drive better business decisions. International Standards bring technological, economic and societal benefits. They help to harmonize technical specifications of products and services making industry more efficient and breaking down barriers to international trade. Conformity to International Standards helps reassure consumers that products are safe, efficient and good for the environment.

### Certification

Certification represents assurance by an independent accredited body of conformity to specific requirements. It covers products and their components, services, people and systems.

Certification can improve reputation, open up new markets or simply enable the company to operate. It also enables companies to manage risk and drive performance, by tracking a number of key variables over a period of time.

The certification process typically includes on-site audits and standardized testing and inspections. Once a certificate has been delivered, it is maintained through regular audits. ISO 9001 sets out the criteria for a quality management system and is the only standard in the family that can be certified to (although this is not a requirement). It can be used by any organization, large or small, regardless of its field of activity. In fact ISO 9001(QMS) is implemented by over one million companies and organizations in over 170 countries. This standard is based on a number of quality management principles including a strong customer focus, the motivation and implication of top management, the process approach and continual improvement. These principles are explained in more detail in the pdf Quality Management Principles. Using ISO 9001:2015 helps ensure that customers get consistent, good quality products and services, which in turn brings many business benefits.

International Standards bring technological, economic and social benefits. They help to harmonize technical specifications of products and services making industry more efficient and breaking down barriers to international trade. Conformity to International Standards helps reassure consumers that products are safe, efficient and good for the environment.

### Inspection

Inspection involves verifying on-site that a product, asset or system meets specified criteria. It covers a wide range of services designed to reduce risk, control quality and verify quantity and meet regulatory requirements.

A product, service or installation is inspected several times during its life cycle, to confirm it is designed and operated efficiently, and meets specified quality and safety standards.

Quantus, inspection services provide our clients with confidence that their products, processes and installations comply with international and local regulations, voluntary standards and their own requirements.

Our experienced inspectors help identify products and shipments which may contain non-standard or non-compliant components and materials. Products and materials that we routinely test and inspect include consumer goods such as clothes, toys, cosmetics, and food, to high-value bulk commodity cargoes such as agricultural products, crude oil, chemicals and refined petroleum products during critical transportation, custody transfer and storage operations.

### Training

QUANTUS is one of the leading providers of training solutions in India on management systems, process improvement, business improvement, soft skills and auditing. QUANTUS helps companies understand, implement and manage business systems and processes through its training solutions in its endeavor to equip your staff with the confidence and expertise they need to attain their goal.

Quantus offers training on a wide range of specialist topics, across all sectors. Our training programs cover regulations, including updates to relevant laws and standards, and implementation of quality and environmental and health and safety programs. Trainings are built on innovative experimental methodologies with global delivery capacity. Our presenters (trainers) are auditors, business improvement specialist, consultants, industry experts as well as trainers who have been exposed to a wide range companies and industries in India and overseas. They develop and deliver courses for both public & in-house training, thus bringing along firsthand experience and knowledge to the delegates.

## Testing & Analysis

Testing determines a product or material's characteristics in a laboratory, or on-site. It provides businesses with confidence that products and materials have the required properties in terms of safety and quality, and that they comply with specifications and applicable rules and regulations.

Risks affecting organizations can have consequences in terms of economic performance and professional reputation, as well as environmental, safety and societal outcomes. Therefore, managing risk effectively helps organizations to perform well in an environment full of uncertainty.

Our global network of testing facilities, staffed by knowledgeable and experienced personnel, enable you to reduce risks, shorten time to market and test the quality, safety and performance of your products against relevant health, safety and regulatory standards

With over 4 years of experience, our experts and global resources are equipped to meet your testing, timeline and product needs. As regulations change and technology is created or innovated, our knowledge and industry involvement ensure your products and business are prepared to meet evolving demands.

We help you bring the best product to market quickly, responsibly, and economically in order to keep your business continually moving ahead.

"Concept" for "Certification"™
